PROJECT: Attendance Manager

TECHNOLOGIES USED:

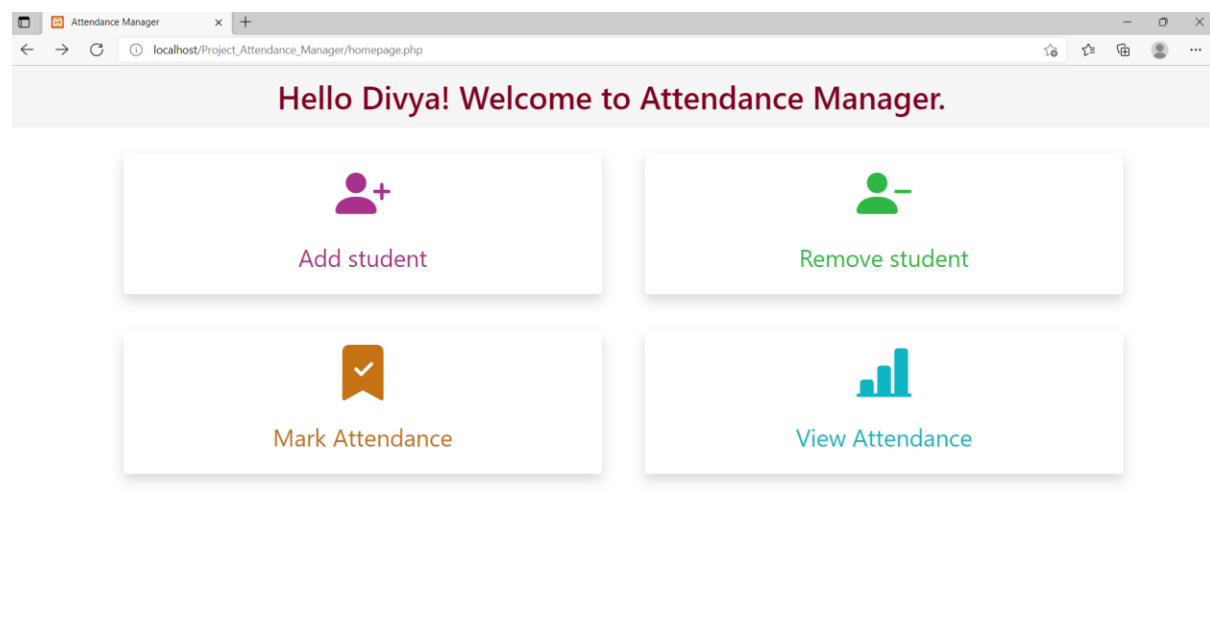

- HTML
- CSS
- Bootstrap
- PHP
- AngularJS
- MySQL

Attendance Manager is web application that can be used to keep a record of attendance of the students. The teacher has to first login. On successfully logging in the teacher has options to:

- Add a student
- Remove a student
- Mark Attendance
- View Attendance of a student for a particular month.

SCREENSHOTS OF THE WEB PAGES:

Homepage:

Add Student:

The screenshot shows a web browser window with the title 'Attendance Manager'. The address bar shows 'localhost/Project_Attendance_Manager/add.php'. The page has a header with the name 'Divya' and a navigation menu: 'Home Page', 'Add Student', 'Remove student', 'Mark Attendance', and 'View Attendance'. The main content area has a red background with the title 'Add Student' and the instruction 'Please enter the details of the student.' Below this is a form with a 'Name' input field, two radio buttons for 'Divison A' and 'Divison B', and an 'Add Student' button.
